ABOUT ME

I have a passion for learning Web Development since I started my first online HTML and CSS' courses in 2019. That's when I decided to change paths and become a Web Developer.

My background in Hospitality and as a Height Technician gave me great Interpersonal skills and the ability to work well under pressure and meet deadlines. I enjoy working with challenges.

Recently, I have completed an immersive and intensive Software Development Bootcamp with Dev Academy where I learned both technical and practical skills while working on multiple projects in a team environment. A life changing experience.

I take joy in working with passionate people. Being a team player, dedicated and self-motivated I am looking for an opportunity within a supportive team for an ongoing career development.
