ABOUT ME

Originally from Brazil, I have been living in and loving Aotearoa for almost 10 years now.

I have a passion for learning and since I started my first online HTML, CSS and JS courses in 2019 I can't get enough of it.

Recently, I have completed a Software Development Bootcamp and after this life changing experience I am a Software Developer keen to continue evolving and learning.

I am an active person who enjoys many kinds of sports and outdoor activities in my free time.

I have a background in Hospitality which gave me the ability to work well under pressure and great Interpersonal Skills. It also helped me improve my attention to details.

I also worked as an abseiler doing building maintenance and this experience taught me the importance of working in a team and meeting deadlines.
